Amendments to the Claims

I claim:

1. (canceled) ~~A display device for displaying one or more photographs or cards of known dimension comprising:~~
 - ~~a. a sheet having a first side and a second side and pre-determined opposing edges;~~
 - ~~b. a plurality of opposing large tabs inset from opposing edges of the sheet, and arranged such that the large tabs are closer together than the display material dimension;~~
 - ~~c. a plurality of small tabs each arranged adjacent to one of the plurality of opposing large tabs and arranged such that the small tabs are closer together than the display material dimension, wherein the large tabs are arranged to engage a first photograph or card in a curved position on the first side of the sheet and the small tabs are arranged to simultaneously engage a second photograph or card in a curved position on the the second side of the sheet.~~
2. (currently amended) The display device of claim 1 further comprising A display device for displaying one or more photograph or card display material of known dimension, rectangular shape, and sized so the opposing edges are pre-determined comprising:
 - a. a sheet having a first side and a second side and pre-determined opposing edges;
 - b. a plurality of opposing large tabs inset from opposing edges of the sheet;
 - c. a plurality of small tabs each arranged adjacent to one of the plurality of opposing large tabs;
 - d. a first and second split tab, with a first half and a second half, cut into the sheet such that each half of each split tab bends to the first or second side of the sheet, and each arranged inset from the opposing edges of the card that are transverse to the edges adjacent to the large tabs and small tabs[[,] ; and
 - e. the large tabs, the small tabs, and the first and second split tabs further arranged such that the split tabs are closer together than the a photograph or card display material of known dimension and the first half of each split tab arranged to engage a first photograph or card in a curved position on one side of the sheet and the second half of each split tab arranged to simultaneously engage a second photograph or card in a curved position on the opposite side of the sheet wherein a first photograph or card

display material is engaged in a curved position on the first side of the sheet and simultaneously a second photograph or card display material is engaged in a curved position on the second side of the sheet.

3. (currently amended) ~~The display device of claim 1 further comprising~~ A display device for displaying one or more photograph or card display material of known dimension rectangular shape, sized so the opposing edges are pre-determined comprising:
 - a. a sheet having a first side and a second side and pre-determined opposing edges;
 - b. a plurality of opposing large tabs inset from opposing edges of the sheet, and arranged such that the large tabs are closer together than a photograph or card display material dimension;
 - c. a plurality of small tabs each arranged adjacent to one of the plurality of opposing large tabs and arranged such that the small tabs are closer together than the photograph or card display material dimension, wherein the large tabs are arranged to engage a first photograph or card in a curved position on the first side of the sheet and the small tabs are arranged to simultaneously engage a second photograph or card display material in a curved position on the second side of the sheet; and
 - d. two or more display device edges are connected by perforations.
4. (currently amended) The display device of claim ~~[[1]]~~ 2 further comprising the display device pre-determined opposing edges are arranged in a shape that relates to the photograph or card displayed.
5. (currently amended) The display device of claim ~~[[1]]~~ 2 further comprising said tabs are varied in shape.
6. (currently amended) The display device of claim ~~[[1]]~~ 3 further comprising item d. is replaced by the following: d. the sheet incorporates a second layer selected from the group consisting of laminates and tackifiers.
7. (currently amended) The display device of claim ~~[[1]]~~ 2 further comprising multiple display devices joined by attachments selected from the group consisting of strings and wires.

8. (currently amended) The display device of claim ~~[[1]]~~ 3 further comprising item d. is replaced by the following: d. an extended and decorative border with score lines for pre-determined bends.
9. (currently amended) The display device of claim ~~[[1]]~~ 3 further comprising item d. is replaced by the following: d. a template printout of said display device created by a computer software program.
10. (currently amended) The display device of claim ~~[[1]]~~ 2 further comprising one or more centrally located marks or holes for hanging.
- ~~11. (canceled) A versatile display device for one or more photographs or cards of known dimension comprising:~~
 - ~~a. a sheet with a first side and a second side and pre-determined opposing edges;~~
 - ~~b. a plurality of opposing split tabs cut into the sheet and arranged such that each half of the split tab bends to the first or second side of the sheet and further arranged such that the split tabs are closer together than the display material dimension, and the first half of each split tab arranged to engage a first photograph or card display material in a curved position on one side of the sheet and the second half of each split tab arranged to simultaneously engage a second photograph or card in a curved position on the opposite side of the sheet.~~
- ~~12. (canceled) The versatile display device of claim 11, further comprising two or more display devices are connected such that a multiplicity of display materials are engaged.~~
13. (currently amended) ~~The versatile display device of claim 11 further comprising A~~ versatile display device for one or more photograph or card display material of known dimension comprising:
 - a. a sheet with a first side and a second side and pre-determined opposing edges;
 - b. a plurality of opposing split tabs cut into the sheet and arranged such that each half of the split tab bends to the first or second side of the sheet and further arranged such that the split tabs are closer together than a photograph or card display material dimension, and the first half of each split tab arranged to engage a first photograph or card display material in a curved position on one side of the sheet and the second half

of each split tab arranged to simultaneously engage a second photograph or card display material in a curved position on the opposite side of the sheet; and

- c. two or more display edges are connected by perforations.
14. (canceled) ~~The versatile display device of claim 11, further comprising said display device edge is arranged in a shape that relates to the display material engaged with said display device.~~
15. (canceled) ~~The versatile display device of claim 11 further comprising said tabs are varied in shape.~~
16. (currently amended) The versatile display device of claim ~~[[11]]~~ 13 further comprising item c. is replaced by the following: c. the sheet incorporates a second layer selected from the group consisting of laminates and tackifiers.
17. (canceled) ~~The versatile display device of claim 11 further comprising multiple display devices joined by attachments selected from the group consisting of strings and wires.~~
18. (currently amended) The versatile display device of claim ~~[[11]]~~ 13 further ~~further~~ comprising item c. is replaced by the following: c. an extended and decorative border with score lines for pre-determined bends.
19. (currently amended) The versatile display device of claim ~~[[11]]~~ 13 further comprising item c. is replaced by the following: c. a template printout of said display device created by a computer software program.
20. (canceled) ~~The versatile display device of claim 11, further comprising one or more centrally located marks or holes for hanging.~~
21. (canceled) ~~The display device of claim 1, further comprising two or more display devices are connected such that a multiplicity of display materials are engaged.~~
22. (previously presented) The display device of claim 2, further comprising two or more display devices are connected such that a multiplicity of display materials are engaged.
23. (previously presented) The display device of claim 2 further comprising two or more display device edges are connected by perforations.
24. (canceled) ~~The display device of claim 2 further comprising the display device edge is arranged in a shape that relates to the photograph or card.~~
25. (canceled) ~~The display device of claim 2 further comprising said tabs are varied in shape.~~

26. (previously presented) The display device of claim 2 further comprising the display device incorporates a second layer selected from the group consisting of laminates and tackifiers.
27. (canceled) ~~The display device of claim 2 further comprising multiple display devices joined by attachments selected from the group consisting of strings and wires.~~
28. (previously presented) The display device of claim 2 further comprising an extended and decorative border with score lines for pre-determined bends.
29. (previously presented) The display device of claim 2 further comprising a template printout of said display device created by a computer software program.
30. (canceled) ~~The display device of claim 2 further comprising one or more centrally located marks or holes for hanging.~~
31. (canceled) ~~A display device for one or more photographs or cards comprising:
 - a. means for removably engaging display material on a first side and a second side of the display device; and
 - b. means for displaying engaged display material in a curved position.~~
